## DETAILED ACTION

### *Double Patenting*

1. The **nonstatutory double patenting** rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).
2. A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a non-statutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b). Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).
3. Claims 1-54 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims in U.S. Patent No. 6,266,649 B1 or 6,317,722 B1.
4. Independent claims 1 and 17 are each a rewording and rearrangement of claim 16 in the '649 patent, with "a table" replacing "a data structure" and a "community" of users replacing a "plurality" of users. One of ordinary skill in the art would know that a data structure is a definition of a table. A *community* of users would be understood by one of ordinary skill in the art, as synonymous, in this context, with a *plurality* of users.
5. Independent claim 33 differs materially from claim 16 in the '649 patent by being limited to *user-specific* histories. The reference claim is limited to developing a *non-user-specific* data structure. Official notice is taken (MPEP § 2144.03) that it was common, at the time of the instant invention, to target incentives, which are a form of product item recommendation, based on user-specific purchase histories. Because a user-specific database eliminates a variable, and would therefore tend to produce superior recommendations for those users with a given amount of data, to base the recommendation on user-specific histories.

Art Unit: 2162

6. Independent claim 33 also does not have the reference limitation to "real time" generation of the recommendation. It is always obvious to modify a claim by deleting limitations.
7. Independent claim 48 is a rewording and rearrangement of claim 16 in the '722 patent with some obvious modifications. The step (a) reference limitation to a non-user-specific data structure has been deleted. The reference "user" is now described as a *target* user.
8. The dependent limitations are either claimed in the reference patents or obvious from them.
